

LONG EQUITY

FACTSHEET - APRIL 2023

LONG EQUITY INVESTMENT STRATEGY

Long Equity runs a concentrated portfolio of value-creators and price-setters. We only hold companies that can (i) invest capital at significantly higher returns than their cost of capital (*value creation*), and (ii) raise prices without impacting demand (*price setting*). Returns on capital must be high, consistent and unleveraged, with competitive advantages, ideally switching costs and network effects, preventing returns and margins from being competed away. We pursue a long-term strategy to minimise transaction costs and defer capital gains by investing in companies capable of compounding indefinitely.

2023	8.4%	-0.7%	4.2%	-1.4%									10.7%

Portfolio

¹ FCF Growth (5yr) is the compound annual growth rate of free cash flow (FCF) per share over the last 5-years. FCF ROC is FCF divided by invested capital (non-current liabilities plus equity) and expressed as a percentage. FCF Margin is FCF divided by total revenue and expressed as a percentage. FCF Yield is FCF divided by market capitalisation and expressed as a percentage. 5yr Linearity is the R-squared value of the share price over the last 5 years. All values presented are weighted to the position size of each company within the portfolio.
