

LONG EQUITY

FACTSHEET - JUNE 2023

LONG EQUITY INVESTMENT STRATEGY

Long Equity runs a concentrated portfolio of value-creators and price-setters. We only hold companies that can (i) invest capital at significantly higher returns than their cost of capital (*value creation*), and (ii) raise prices without impacting demand (*price setting*). Returns on capital must be high, consistent and unleveraged, with competitive advantages, ideally switching costs and network effects, preventing returns and margins from being competed away. We pursue a long-term strategy to minimise transaction costs and defer capital gains by investing in companies capable of compounding indefinitely.
